

Purpose

This document is intended to outline the steps required to manually install Nagios XI on a Linux machine. Want installation help? [We will do it for free.](#)

Target Audience

This document is intended for use by Nagios Administrators who want to manually install Nagios XI on a Linux machine.

Platform Support

Nagios Enterprises provide support for installing Nagios XI on the following Linux Distributions:

- Red Hat Enterprise Linux (RHEL)
 - 6.x 32-bit and 64-bit
 - 7.x 64-bit
 - RHEL requires the Optional software channel to be enabled, further details are located here:
 - [Enabling RHEL Optional Software Channel](#)
- CentOS
 - 6.x 32-bit and 64-bit
 - 7.x 64-bit
- Oracle Linux
 - 6.x 32-bit and 64-bit
 - Oracle Linux 7.x
 - Oracle Linux 7 requires the Optional repository to be enabled, further details are located here:
 - [Enabling Oracle Linux Optional Repository](#)
- Debian
 - 8.x 32-bit and 64-bit

- 9.x 32-bit and 64-bit
- Ubuntu
 - All active Long Term Support (TLS), these are all the even numbered versions (14, 16, 18)
 - 32-bit and 64-bit

If you discover bugs or have fixes for installing Nagios XI on other platforms, please let us know. We will do our best to incorporate your improvements to expand support for additional platforms in future XI releases, which will make future installation processes smoother for you and your clients.

Installation Prerequisites

Important: Nagios Enterprises highly recommends and will only support installing Nagios XI on a newly installed, "clean" system (a bare minimal install with nothing else installed or configured).

Attempting to install Nagios XI on a pre-existing system with other applications already installed can cause the Nagios XI installation process to fail, critical system components and settings (e.g. database servers) to be modified in a way that negatively affects other applications, and previously installed applications to be automatically upgraded or removed. While installing XI on a system with other applications is possible, it is not recommended due to the possible interactions and complexity of multiple components that are required for Nagios XI to function. If you choose to ignore these warnings, you do so at your own risk.

Other Nagios products (Network Analyzer, Log Server and Fusion) should not co-exist on the same server.

Nagios XI hardware requirements can be found in the following documentation:

[Nagios XI Hardware Requirements](#)

Internet access is required for installation and upgrades!

Terminal Access

These instructions require you to establish a terminal session to the server you plan to install Nagios XI on. You will need to login to your server as the root user to perform the installation (or a user with root privileges).

Install Nagios XI

There are two methods for installing Nagios XI, they both perform a full installation.

Quick

Execute the following command in your terminal session:

```
curl https://assets.nagios.com/downloads/nagiosxi/install.sh | sh
```

That one command will download and install Nagios XI. Please proceed to the [Finalize Installation](#) section.

Manual Download

Alternatively, you can install Nagios XI by issuing the following commands in your terminal session:

```
cd /tmp
wget https://assets.nagios.com/downloads/nagiosxi/xi-latest.tar.gz
tar xzf xi-latest.tar.gz
cd nagiosxi
./fullinstall
```

Note: If you need to install a specific version of Nagios XI, please visit the following page of Nagios XI versions to obtain the URL

<https://assets.nagios.com/>

Finalize Installation

Once the installation has completed you should see a message like the following:

```
Nagios XI Installation Complete!
```

```
-----
```

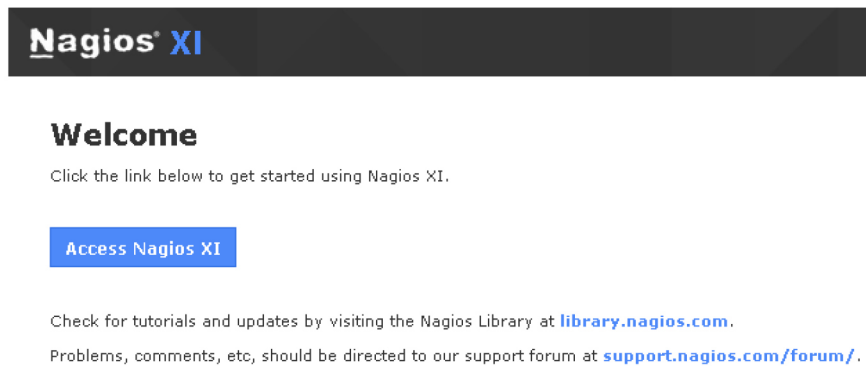

```
You can access the Nagios XI web interface by visiting:
```

```
http://<server_address>/nagiosxi
```

Navigate to the user interface by using the URL provided in your terminal session.

You will be presented with the **Final Installation Steps** screen just like this:

Click the **Access Nagios XI** button to begin.

You will be first prompted to define the **General System Settings**.

Once you've made your desired selections click the **Next** button.

The next page provides you with options for the **Admin Account**.

The most important setting you need to change here is the Administrator Password (you don't need to use the one that is randomly generated).

Click **Finish Install** to save these settings.

The page will display a spinning logo while it applies your settings to Nagios XI.

The Installation Complete screen will be shown with the username and password required to login to Nagios XI.

Click the **Login to Nagios XI** button to begin.

Install

Nagios XI Installation

Finalize your Nagios XI installation and step the initial configuration. These settings can be changed later.

License Agreement

You must agree to the Nagios Software License Terms and Conditions before continuing using this software.

Nagios Software License Terms and Conditions

PLEASE READ THIS AGREEMENT CAREFULLY BEFORE PURCHASING OR USING NAGIOS SOFTWARE. BY PURCHASING OR USING NAGIOS ENTERPRISES' SOFTWARE, YOU SIGNIFY YOUR ASSENT TO THIS AGREEMENT. IF YOU ARE ACTING ON BEHALF OF AN ENTITY, THEN YOU REPRESENT THAT YOU HAVE THE AUTHORITY TO ENTER INTO THIS AGREEMENT ON BEHALF OF THAT ENTITY. IF YOU DO NOT ACCEPT THE TERMS OF THIS AGREEMENT, THEN YOU MUST NOT PURCHASE OR USE NAGIOS SOFTWARE.

This Software License Terms and Conditions Agreement ("Agreement") is a legal agreement between Nagios Enterprises, LLC ("Nagios Enterprises") and the purchaser or user of Nagios Software ("Customer"). The effective date of this Agreement ("Effective Date") is the earlier of the date that Customer signs or accepts this Agreement or the date that Customer purchases or begins using Nagios Software.

1 DEFINITIONS

For the purposes of this Agreement, the following terms shall have the following meanings:

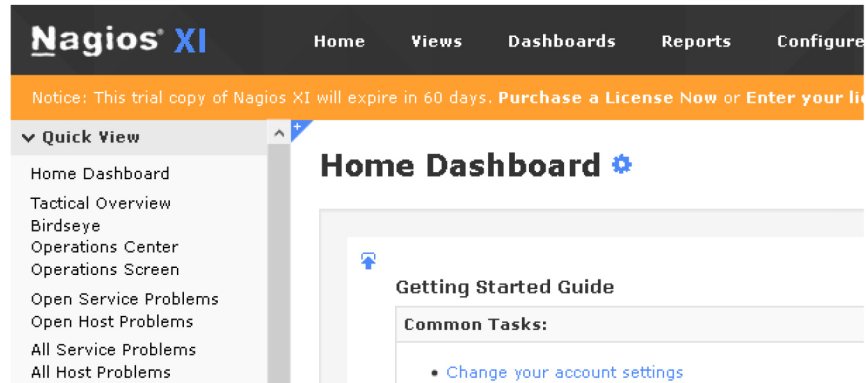

1.1 Nagios Software. All commercial and proprietary software programs, configurations, scripts, images, and intellectual property contained in Nagios Enterprises' commercial products and developed by, owned by, or licensed to Nagios Enterprises, with the exclusion of Third Party Software.

1.2 Third Party Software. Any software programs, configurations, scripts, images, and intellectual property contained in or distributed

☒ I have read, understood, and agree to be bound by the terms of the license above.

Submit

You will be logged into Nagios XI and be placed at the home screen.

Finishing Up

This completes the documentation on how to manually install Nagios XI on a Linux machine.

Nagios has a variety of resources to help get you up and running.
